Career Objective

Highly motivated & results-oriented AWS & DevOps Engineer with hands-on experience in cloud infrastructure, DevOps automation, CI/CD pipeline management, and DevSecOps practices, Seeking a challenging role in an organization that values innovation & teamwork, where I can utilize my skills to contribute to the company's growth.

Education

Marri Laxman Reddy Institute Of Technology And Management, Hyderabad-Telangana. *2024*
B-Tech – Computer Science and Engineering (CSE)
CGPA/Percentage: 8.26

Sri Aadrash Junior College, Hyderabad-Telangana. *2020*
Telangana State Board of Intermediate Education (MPC)
CGPA/Percentage: 9.62

Panchasheela High School, Hyderabad-Telangana. *2018*
Board Of Secondary Education Telangana(SSC)
CGPA/Percentage: 8.33

Software Engineer

Software Engineer at Arohak Technologies Pvt. Ltd. Jul 2025 – Present

Currently working as an AWS & DevOps Engineer, I build and maintain automated CI/CD pipelines, manage deployments, and maintain AWS cloud environments to ensure application reliability and scalability. I monitor system performance, optimize workflows, and implement infrastructure as code using tools such as Docker, Jenkins, Kubernetes, Bitbucket, Terraform, and YAML scripting, I also work on security and compliance practices using SonarQube, SOC2 scanning, & Stytch authentication to support secure and reliable production environments.

Projects

Crenma:

- **Crenma – Certificate Management Platform**
  Crenma is an end-to-end certificate management platform designed to automate SSL/TLS certificate renewal across diverse client environments. It supports trusted certificate providers such as Sectigo, Let's Encrypt, and Google Trust Services (GTS), providing secure and reliable certificate lifecycle management.

Roles & Responsibilities:

- Developed and maintained CI/CD pipelines using Jenkins and Bitbucket to automate application build, validation, and deployment processes.
- Implemented Infrastructure as Code (IaC) using Terraform to provision and manage AWS resources consistently across environments.

- ontainerized applications using Docker and supported container image management and deployment workflows using Amazon ECR and Amazon ECS.
- Configured and managed AWS services, including EC2, S3, EFS, RDS, VPC, Application Load Balancer (ALB), CloudFront, and Route 53.
- Configured AWS IAM roles and policies, AWS KMS, AWS Secrets Manager, and AWS WAF to support secure access, encryption, and application protection.
- Worked with AWS Lambda, EventBridge, API Gateway, and Amazon SES to support event-driven automation and application integrations.
- Supported security and compliance activities through SonarQube, SOC 2 scanning, and Stytch authentication integration.
- Performed Linux administration, troubleshooting, and deployment support using AWS CLI, Bash scripting, and YAML configuration.

Secure Transfers:

- **Secure file-sharing and file-transfer platform**:
  SecureTransfers is a secure file-sharing and file-transfer platform supporting B2B, H2H, G2G, H2M, and M2H workflows. It uses CrushFTP to enable secure file exchange through SFTP, FTPS, and HTTPS/TLS, with PGP encryption and decryption to protect sensitive data.

Roles & Responsibilities:

- Developed and maintained CI/CD pipelines using Jenkins and Bitbucket to automate application build and deployment processes.
- Provisioned and managed AWS infrastructure using Terraform and AWS CloudFormation.
- Configured and maintained AWS networking components, including VPC, Load Balancers, Route 53, and Client VPN.
- Managed AWS storage services, including S3 and EFS, and supported NFS and SMB file-sharing configurations.
- Supported CrushFTP configuration & secure file-transfer workflows using SFTP, FTPS, and HTTPS/TLS.
- Configured monitoring, logging & alerting using Amazon CloudWatch, CloudWatch Alarms, Grafana, & Amazon SNS.
- Implemented security and compliance checks using SonarQube, SOC 2 scanning, AWS KMS, and AWS Secrets Manager.
- Automated infrastructure and operational tasks using Terraform, YAML, Bash scripting, and AWS CLI.
- Performed Linux administration, troubleshooting, deployment support, and operational maintenance

Technical Skills, Soft Skills and Interests

AWS Cloud Skills: ECS, EKS, ECR, S3, EFS, RDS, CloudFront, API Gateway, Lambda, KMS, WAF, ACM, CloudWatch Alarms, SNS, SES, CloudFormation, AWS Marketplace.

DevOps & CI/CD: Docker, Kubernetes, Terraform, Jenkins, Bitbucket, Git, CI/CD Pipeline Automation, Ansible, YAML Scripting, Python, Bash Scripting, Linux.

Security & Compliance: SonarQube, SOC 2 Scanning, Stytch Authentication.

Soft Skills: Adaptability, Positive, attitude, Teamwork.

Certificates

AWS Certified Cloud Practitioner in Udemy
